SETTING TEMPERATURE

This unit constantly displays the current room temperature in either degrees Celsius (°C) or degrees Fahrenheit (°F). To choose a temperature scale:

- On back of the unit, press °C/°F button until the desired temperature scale (°C or °F) is displayed on front of the unit.
- Each press of the °C/°F button toggles between degrees Celsius and degrees Fahrenheit.

ON A WALL

This clock is supplied with a screw for hanging on a wall. For best viewing of the LCD, hang the clock at a minimum height of 6 foot 5 inches to obtain the viewing angle of approximately 70° as indicated.

CARE AND MAINTENANCE

This product is engineered to provide years of satisfactory service if handled carefully. Here are a few precautions:

1. Never use chemicals such as benzene or petroleum-based solvents for cleaning, as they may damage the case.
2. Do NOT expose the clock to direct sunlight, spotlight, or extremely hot or cold temperatures.
3. Clean the case by using a cloth slightly dampened with water and wipe dry.

OPERATIONAL DIFFICULTIES

If this clock does not function properly for any reason, replace the batteries with new, high-quality batteries (see “Battery Installation” section). Low battery power can occasionally cause any number of “apparent” operational difficulties, such as screen dimming or difficulty in reading the display. Replacing the batteries with new, fresh batteries will solve most difficulties.

BATTERY REPLACEMENT

Erratic readings, a faint display, or no display are all indicators that the batteries must be replaced. Lift the battery compartment door on back of unit. Remove the exhausted batteries and replace with two new AA alkaline batteries. Replace the battery compartment door. The clock will start running from 12:00 A.M. January 1, 1996. Replacement battery Cat. No. 1111.
