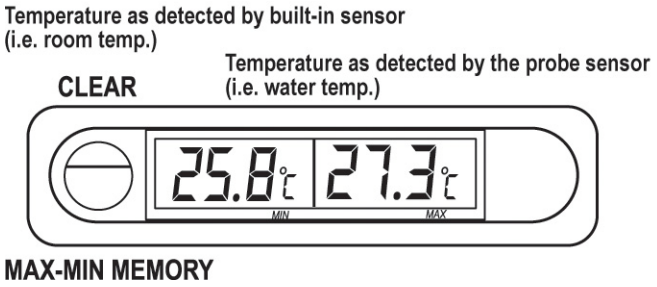
TRACEABLE® STICK™ THERMOMETER INSTRUCTIONS

INSTALLATION INSTRUCTIONS

1) Probe sensor: Place the submersible probe inside the tank and press the suction cup against the inner wall. Choose a position which is less affected by light or plant for more reliable readout.

2) Unit: Remove the protective paper of the double-sided tape and press the unit against any clean surface for mounting.



OPERATING INSTRUCTIONS

1) Temperature readouts will display after battery is inserted.

2) Press MAX-MIN MEMORY button will display maximum and minimum, readouts of room temperature. Second press will display maximum and minimum readouts of water temperature. Third press, or after 8 seconds the display will show current temperature readout.

3) If you press CLEAR after maximum or minimum temperature readout is recalled from the record, you will start a new memory record and the old one is erased. Maximum/Minimum temperature is the Highest/Lowest temperature readout as picked up from the accumulated temperature readouts. Thus you can specify, HOURLY, DAILY, WEEKLY, MONTHLY Room/Water max-min memory record by yourself.
