Begin WiFi Setup

Press/HOLD WiFi button for 3 secs. "**RP**" will appear on display.

Wait for a few seconds then press WiFi button, "**RP ~ ERJU**" will appear on display.

Connect Unit to WiFi network via Mobile device

Using a WiFi enabled device, find

CC6500-XXXX

in available networks.

XXXX will be last 4 digits of unit's S/N# (on back of unit).

Open Web Browser on your mobile device

Enter into web browser: **192.168.1.1** Select your Network from drop-down menu and enter password.

Press Add/Confirm device restart

Click Add

The most common network is WPA2. Unit will reboot, connect to WiFi, and begin posting data.

Note: Upon successful connection, the current page will no longer be available for the current device.

Note: Device reboot may take up to 1 minute.

Note: The WiFi symbol will flash on device display until the device posts data successfully.

Note: Allow up to 15 mins (for 15 minute logging interval) for device data to update.

Device setup is now complete!
