

DUST'IT™ BLOWER

USAGE

Powerful bulb duster forcibly blows away dust, lint, and dirt. It provides high pressure, pinpoint jets of air exactly where desired. Varying the “squeeze” provides for controlled delivery.

ONE-WAY INLET VALVE

One-way inlet valve at the top prevents air from being drawn back through the tip.

NON-CONDUCTIVE TIP

The clear non-conductive plastic sleeve-tip prevents scratches and permits cleaning optical lenses, slides, circuit boards, and cuvetts. It's ideal for delicate, difficult-to-clean, and inaccessible equipment.
Do not remove the clear non-conductive tip.

Dust'It™ is a trademark of Cole-Parmer.
