

SINGLE ACTION STOPWATCH

Usage

To begin timing, depress the crown.

To stop timing, depress the crown again.

Record the time.

To return to zero, depress the crown.

Maintenance

The internal spring of the stopwatch requires periodic winding to operate properly. To wind the stopwatch, turn the crown in a clockwise direction. Be careful not to overwind the spring as this could cause the spring to break.

Do not expose the stopwatch to liquids or a damp environment.
