

1 Log into your TraceableLIVE account*

***To create a TraceableLIVE account:**
Go to TraceableLIVE.com or
Download app for iOS or Android.

2 Adding Data Logger to account

Open TraceableLIVE app on mobile or desktop and Log in to account:

Tap the **+** icon to add a device.

- Permission must be given to TraceableLIVE app to access your mobile device's camera.
- Using your mobile device's camera hover over QR code on back of unit (see right).
- App will automatically fill in device information.

Note: QR code only works with a mobile device.

3 Wi-Fi setup on Data Logger

Press/HOLD Wi-Fi button "AP" will appear on display.

Press Wi-Fi button again, "AP URIF" will appear on display.

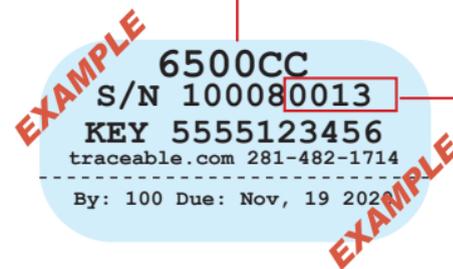

When "AP rERdy" appears, proceed to next step.

4 Use internet-enabled device to connect to wi-fi

Select Network:
CC6500-0013
see example network

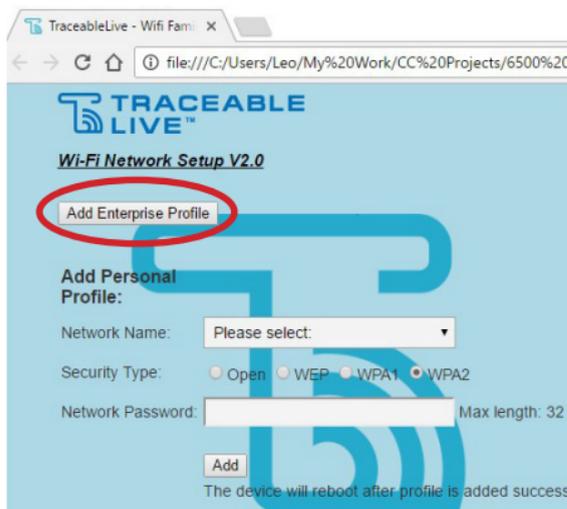

Example Network: CC6500-0013

5 For Enterprise Wi-Fi networks**, follow Steps 5 & 6
Otherwise go to Step 7

Open browser. Type 192.168.1.1 in address bar

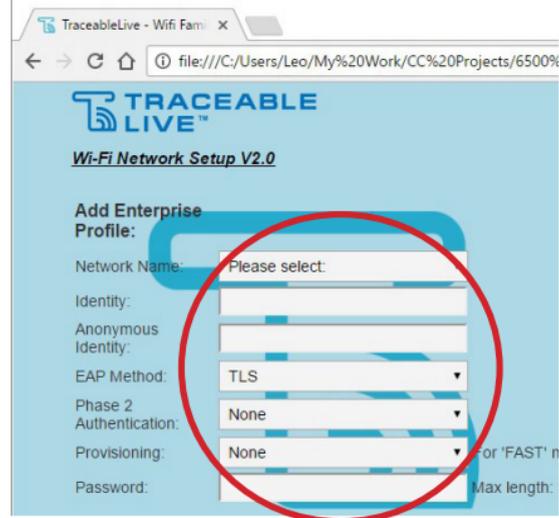

On this page, click Add Enterprise Profile.

**Enterprise network authentication must be identity/password-based. Certificate-based enterprise networks are not supported.

6 Enterprise Wi-Fi profile

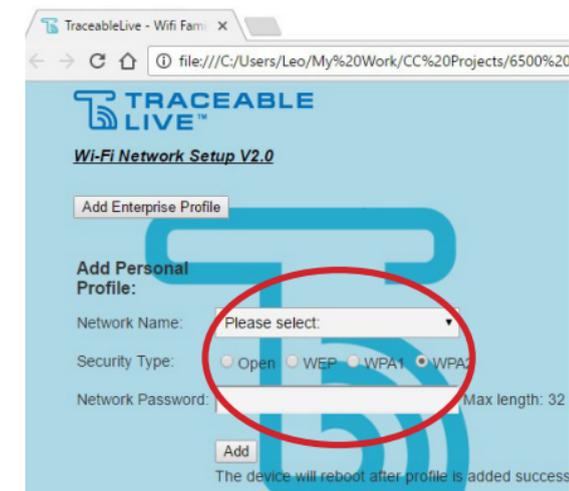

On this page, select your Network Name from dropdown list. Input Identity (username), Anonymous Identity (if any). Select EAP Method, Phase 2 Authentication, Provisioning, and Password. **Click Add.**

Contact your network administrator if these parameters are not known.

7 Open browser, type 192.168.1.1 in address bar

On this page, select local network and enter password. Security type WPA2 recommended or contact your network admin.

CONGRATULATIONS!
Your device will restart.
