TraceableLIVE® Cloud Service for remote monitoring and ease of mind

Refrigerator/Freezers • ULT Freezers • Chemical Storerooms • Greenhouses • Cryogenic (LN$_2$) Storage • Controlled Warehouses

Ideal for labs, research organizations, clinics, healthcare providers and anyone who requires that samples remain within set tolerances for temperature, humidity, barometric pressure, or CO_2. Protect your vaccines, pharmaceuticals, biological materials, or other product from degrading due to improper storage or transport conditions.

TraceableLIVE Cloud Service

- Cloud-based application—no local software required; web, Android™, iOS data visibility

- Receive Apple Watch, Voice call*, mobile push, e-mail, text notifications

- Easy setup with mobile QR code

- Continuous data transmission and monitoring using SSL-encrypted SECURE connection

- Generate data reports in real time, data backup guaranteed

- View conditions and set alarm parameters on device remotely

- Expanded use with 21 CFR Part 11 compliance with premium subscription

*Requires a Premium subscription

2
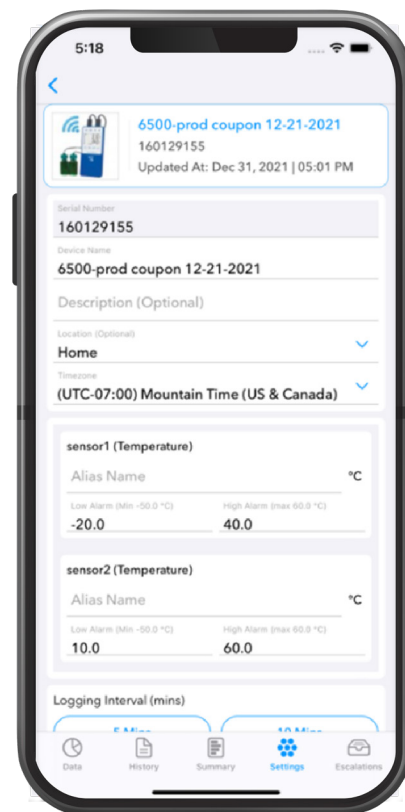

Reduce Your Risk

Real-time, remote monitoring—receive email, in app messages, or text alerts

Easy Mobile Setup

Get connected to your devices and start monitoring in less than 2 minutes
Broad-Range Applications

Temperature, humidity, barometric pressure, CO_2

Personalize dashboards to immediately see data that is important to you.

Quickly find devices by name, location, or alarm status.

Choose how you want to get notified of any alert status. Each location allows up to 3 notification types: email, in app messages, or text alerts.

You can even set notifications to escalate to other team members if alerts are not addressed.
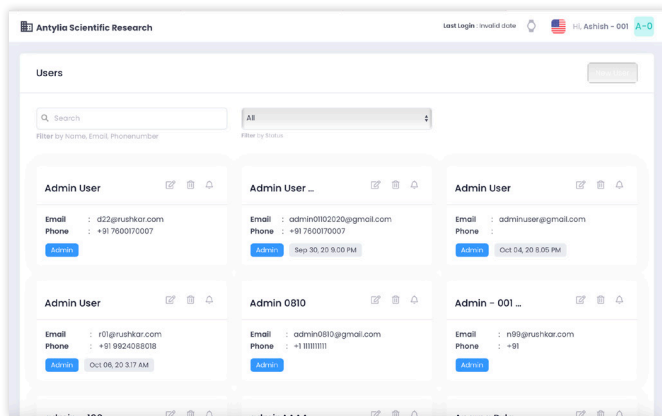

Easily manage user access and device details.
View device data by channel, a specific time, or current time.

At a glance see readings, alarm settings and statuses, Wi-Fi strength, battery level, and more.

The sooner you know the better!

- Voice Notification Escalation now available for TraceableLIVE Premium subscribers

- TraceableLIVE Premium subscribers will now be able to set up an escalation path that generates an automated phone message for out-of-range conditions to mobile and landline phones

- Easy setup—just configure as an Escalation in the Escalations menu

- Ideal for high importance escalations

Meet compliance requirements with USB for VFC

- All TraceableLIVE users will be able to output secure PDF files as required by California code

- Download CSV files from all Traceable® Excursion-Trac™ devices

- Upload USB data from Excursion-Trac data loggers to the TraceableLIVE cloud

Performance and speed improvements with app update

- App will automatically update on your phone OR you can manually update it if auto-updates are turned off

- All TraceableLIVE users will be able to receive the new updated app

- Update allows TraceableLIVE to better support users with future functionality improvements

*SMS Text notifications add $2+/month/device (credit card only).

**Meets 21 CFR Part 11 North American Compliance and Annex 11 for Europe.

Traceable® Wi-Fi Data Loggers compatible with TraceableLIVE® Cloud Service*

Get immediate alerts before you lose valuable samples

- Wi-Fi enabled digital data logger connects easily to network and provides continuous data transmission to the app interface

- Ideal for use in healthcare and vaccine monitoring (VFC compliant**)

What's Included: Probe with 10-ft (3-m) cable or USB dongle that is inserted into device, holder with magnetic back, four AAA alkaline batteries, and NIST-traceable calibration certificate with data.

Parameters	Range	Resolution	Accuracy	Probe	Item number
Temperature	−50.00 to 60.00°C (−58.00 to 140.00°F)	0.01°	±0.25°C	2 glycol-filled temperature buffered bottles probes	6500
				1 bottle & 1 bullet	6501
				2 plastic bullet waterproof probes	6502

Traceable® Ethernet Data Logging Thermometers compatible with TraceableLIVE® Cloud Service*

Always on, always connected

- Thermometer recalibration is accomplished by simply replacing the probe

- View current temperature conditions anywhere—cloud-based interface sends email, text, and push notifications

- Connect to your data via smartphone, tablet, or PC using TraceableLIVE cloud service*

These data logging thermometers with Ethernet offer an easy and secure way to connect your smartphone, tablet or personal computer remotely with your water baths, refrigerators, freezers and biological/pharmaceutical lab equipment.

Once setup is complete, you can securely monitor parameters 24/7, control your alarms remotely, view your data logging history, run reports in real time and give access to other team members. Each thermometer includes a replaceable, calibrated probe. Thermometer 99469-01 includes a bottle probe filled with nontoxic glycol protecting it from rapid temperature changes when the refrigerator or freezer door is opened. Thermometer 18004-37 comes with a stainless steel probe that measures a wide range of temperatures.

What's Included: Probe with 10-ft (3-m) cable, holder with magnetic back, Ethernet cable, universal power adapter and plug with 5-ft (1.5-m) cord, three AAA alkaline batteries, and NIST-traceable calibration certificate.
